

THE COAST GUARD IS ON DUTY **24/7.**

BECAUSE PROTECTING OUR MARITIME BORDERS IS **PRIORITY 1.**

Potential threats to our nation's welfare should know one thing: the U.S. Coast Guard never sleeps. More than ever before, the Coast Guard is prepared to handle traditional missions like search and rescue, drug and migrant interdiction, and environmental protection—along with vital new missions like detecting threats before they reach our shores, keeping our waters secure, and strategically pushing out our borders. The Deepwater program provides the Coast Guard with every available resource to accomplish these crucial missions around the clock, day after day. All to keep threats where they belong: far, far away.
